

GRASS SLASHER

The **Major Grass Slashers** are single rotor machines ideally suited for cutting rough pastures, forestry ridges, grass verges, heathland and areas where rushes and heather prevail.

The compound blade system is capable of tackling material of up to 30mm in diameter. Each machine is fitted with two heavy duty swinging blades fitted to a compound blade beam.

Protection is afforded to the tractor by using a shear-bolt in the PTO shaft.

Cutting height is set by adjusting two bolt- on side skids, which have wide runners preventing damage to the ground.

MODEL	Overall Width	No. of Blades	Power Req.	Input PTO Speed	Blade Tip Speed	Cutting Range
601SL	5' 10" 1559mm	2	25-50HP	540RPM	3887 m/min 12755 ft/min	1/2" to 10" 12-250mm
605SL	6' 3" 1905mm	2	30-60HP	540RPM	4301 m/min 14114 ft/min	1/2" to 10" 12-250mm
